ABOUT ME

I am a results-oriented Computer Engineer with over three years of experience in designing and implementing software solutions. I specialize in system architecture, artificial intelligence, and cybersecurity, turning complex concepts into efficient, user-friendly applications.

EXPERIENCE

2021 – 2022

Front-End Developer

My Personal Portfolio

I have a professional and design-focused project where I've designed my own website using UI/UX design. I can receive great support by providing referrals from businesses and freelancers.

2022 – 2023

Web Designer

FİGMA Design

I completed the entirely hand-crafted website with a polished design that complements the user experience. I create a design that stands out thanks to custom icons and designs.

2024 – 2025

Web Developer

Law Project - LAWTY

I create a lawyer website and offer people a script with an admin panel. You can view my work on Github.
